

VERGERS BOIRON QUALITY PÂTES DE FRUITS

PREFER THE PUREES

Replace fresh fruit with
Vergers Boiron frozen fruit purees.

You will save time in preparing the fruit, while
guaranteeing its constant quality and the
availability of flavours all year round. You will
find the original flavour and colour of the fruit.
These are natural purees, guaranteed
without colouring or preservative.
**You can invent an infinite range of
Vergers Boiron fruit puree combinations.**

SELECTION OF FRUIT: A FAMILY SECRET

In the Boiron family, each generation knows
that the quality of the fruit
guarantees the quality of
the end product. They
understand why
Vergers Boiron fruit are
strictly and passionately
selected all over the world.
For Vergers Boiron,
a country is never too
far to pick the
best fruit.

BOIRON FRÈRES S.A.

A CLOSE WORKING RELATIONSHIP: THE INGREDIENT FOR SUCCESS

To bring out the talent of pastry-chefs and satisfy the
gourmet requirements of their customers and guests,
Vergers Boiron innovate, imagine and discover. After
having launched the fruit puree use table for sorbets and
mousses, the Pâtes de fruits table enhances the pastry-
chef's showcase while simplifying his creative work.

Defrosting: the gentle method

The way you defrost purees influences the quality of the
dessert. The most perfect method is the simplest: just place
the container in the refrigerator 12 hours before use to
preserve the authentic flavour of the fruit.

1) PATES DE FRUITS PREPARATION *

1. Bring the fruit puree to the boil in a round-bottomed copper plan, while stirring.
2. Sprinkle over the pectin mixture* and caster sugar, boil for 2 to 3 minutes.
3. Mix the granulated sugar with the fruit puree in 3 or 4 successive stages, then add the glucose.
4. Cook together at 107°C (225°F) to obtain 75° brix on the refractometer.
5. Then add the tartaric acid solution **.
6. Stop the cooking process by pouring in 10 g (0.35 oz) of water or alcohol (optional).

* Pâtes de Fruits is known in some countries as fruit jellies, crystalised fruit or candied fruit.

★ For these flavours, it is necessary to add a basic fruit puree, for better quality and to enhance the main flavour.

2) PATES DE FRUITS PREPARATION WITH
THE ADDITION OF A BASIS PURÉE *

1. Bring the pear or apricot puree to the boil in a round-bottomed copper pan, while stirring.
2. Sprinkle over the pectin mixture* and caster sugar, boil for 2 to 3 minutes.
3. Mix the granulated sugar with the pear or apricot puree, in 3 or 4 successive stages, then add the glucose.
Cook together at 112°C (234°F).
4. Cool down with the chosen fruit puree previously heated to 60°C (140°F).
Cook together at 107°C (225°F) to obtain 75° brix on the refractometer.
5. Add the tartaric acid solution **.
6. Stop the cooking process by pouring in 10 g (0.35oz) of water or alcohol (optional).

3) RECOMMENDATIONS FOR SUCCESSFUL
PÂTES DE FRUITS

- Check cooking on the refractometer and thermometer.
- Cook the sweetening ingredients first, as quickly as possible, frequently cleaning the edge of the pan.
- When adding the sugar, make sure the cooking temperature does not fall below 85° C (185°F) to prevent the pectin gelling.
- Once cooked, you should be able to run your fruit jelly into a mould or frame and level it off to obtain the required thickness.
- Leave the fruit jelly to rest outside the frame for 48 hours on both sides. Cut it, coat in granulated sugar and leave to rest again for 48 hours.
- Storage: Temperature of the premises below 26° C (79°F)

*To prepare the Pâtes de fruits, prefer to use slow setting pectin, specially for Pâtes de fruits (E 440).

**To obtain a tartaric acid solution: Boil 200 g (7 oz) of water and add 200 g (7 oz) of tartaric acid. This solution may be stored in a bottle. Tartaric acid can be replaced by citric acid or lemon juice.

***For citrus fruit, it is recommended to add 10% of Vergers Boiron concentrated Puree corresponding to the flavour of the Pâte de fruit.

Recipes elaborated by Ollivier Christien Pastry Chef at Les Vergers Boiron.
